1.1 TIER ONE ENTERTAINMENT

In the digital era of advertising, those who don't take gaming seriously will be left behind. – Dave John G. Ravina, CEO OF TIER ONE ENTERTAINMENT.

Developer of a gaming and Esports talent platform designed to reach the coveted gaming audience. The company's platform aims to revolutionize the Esports landscape by developing gaming talents with a focus on streamers, and professional teams, enabling Esports gamers to connect with brands to generate revenue.

Since 2017 Tier One Entertainment has been transforming South East Asia's most progressive brands into global influencers. Through powerful storytelling, immersive experiences and strategic partnerships across Esports, Gaming, Fashion, Music and Digital Entertainment.

Dave John G. Ravina

CHIEF EXECUTIVE OFFICER

Dave John G. Ravina is locally known as one of the first two shout casters in the country. He is also known for organizing numerous events and one of the pioneers of Philippine esports. He has numerous experiences in esports from shout casting, event organizing, esports publications, influencer management, marketing thru esports, managing professional esports teams, and more. He was once a competitive player that started out organizing events due to the lack of opportunities for tournaments in the region.

1.2 Problems

STATEMENT OF THE PROBLEM

They are expecting the Internal Support Team to develop the network infrastructure plan. This will include, but is not limited to:

1. Recommendations on network equipment

a. Computer Specification

1 st Floor	SPECIFICATIONS
Reception Area 1PC	Processor: AMD A6-6400K APU WITH RADEON™ HD GRAPHICS 3.90 GHZ Installed Memory (RAM): 4.00GB System Type: 32-bit Operating System Storage: 500GB SSD
Creative Team/Department Team 6 PC	Corsair One A200 CPU: Intel Core i9 GPU: Up to RTX 3080 Ti RAM: Up to 64GB DDR4 3200 Storage: 1TB SSD

2 ND FLOOR	SPECIFICATIONS
Streaming Rooms 6PC	Corsair Vengeance CPU: Intel 10850K GPU:Nvidia RTX 3090 RAM: Up to 64GB DDR4-3200 Storage: 1TB SSD
	HP Omen CPU: Intel Core i9 10900K

Entertainment Room (Podcast) 1PC	GPU: Up to Nvidia RTX 3080 RAM: Up to 64GB DDR4-3200 Storage: 1TB SSD
Shout casting Room 1PC	HP Omen CPU: Intel Core i9 10900K GPU: Up to Nvidia RTX 3080 RAM: Up to 64GB DDR4-3200 Storage: 1TB SSD

3 RD FLOOR	SPECIFICATIONS
Finance Department 3PC	Processor: AMD A6-6400K APU WITH RADEON™ HD GRAPHICS 3.90 GHZ Installed Memory (RAM): 4.00GB System Type: 32-bit Operating System
Marketing Department 3PC	Processor: AMD A6-6400K APU WITH RADEON™ HD GRAPHICS 3.90 GHZ Installed Memory (RAM): 4.00GB Storage: 500GB SSD System Type: 32-bit Operating System

2. Recommendations on network cabling

Figure 1. Cat 6 Illustration

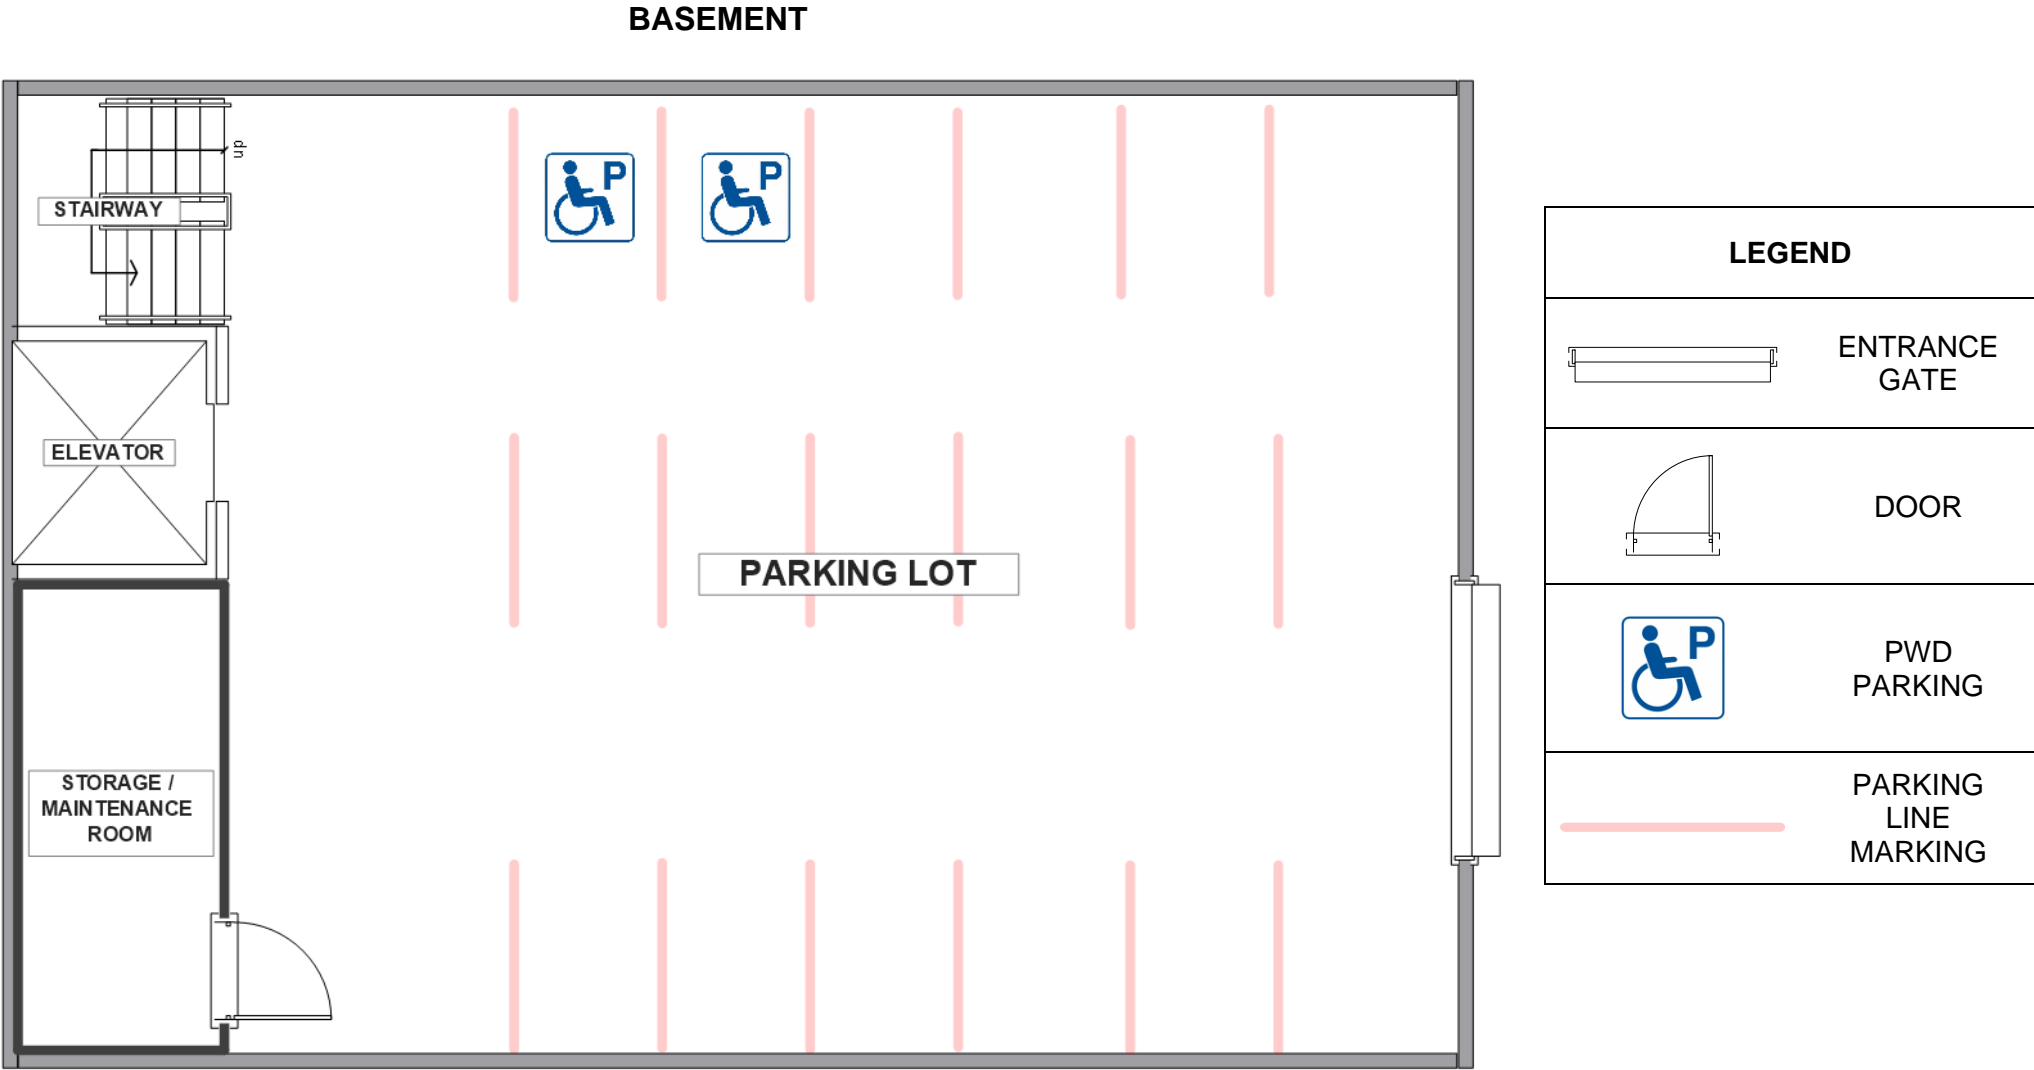

Figure 1.2 Cat 6 Actual Photo

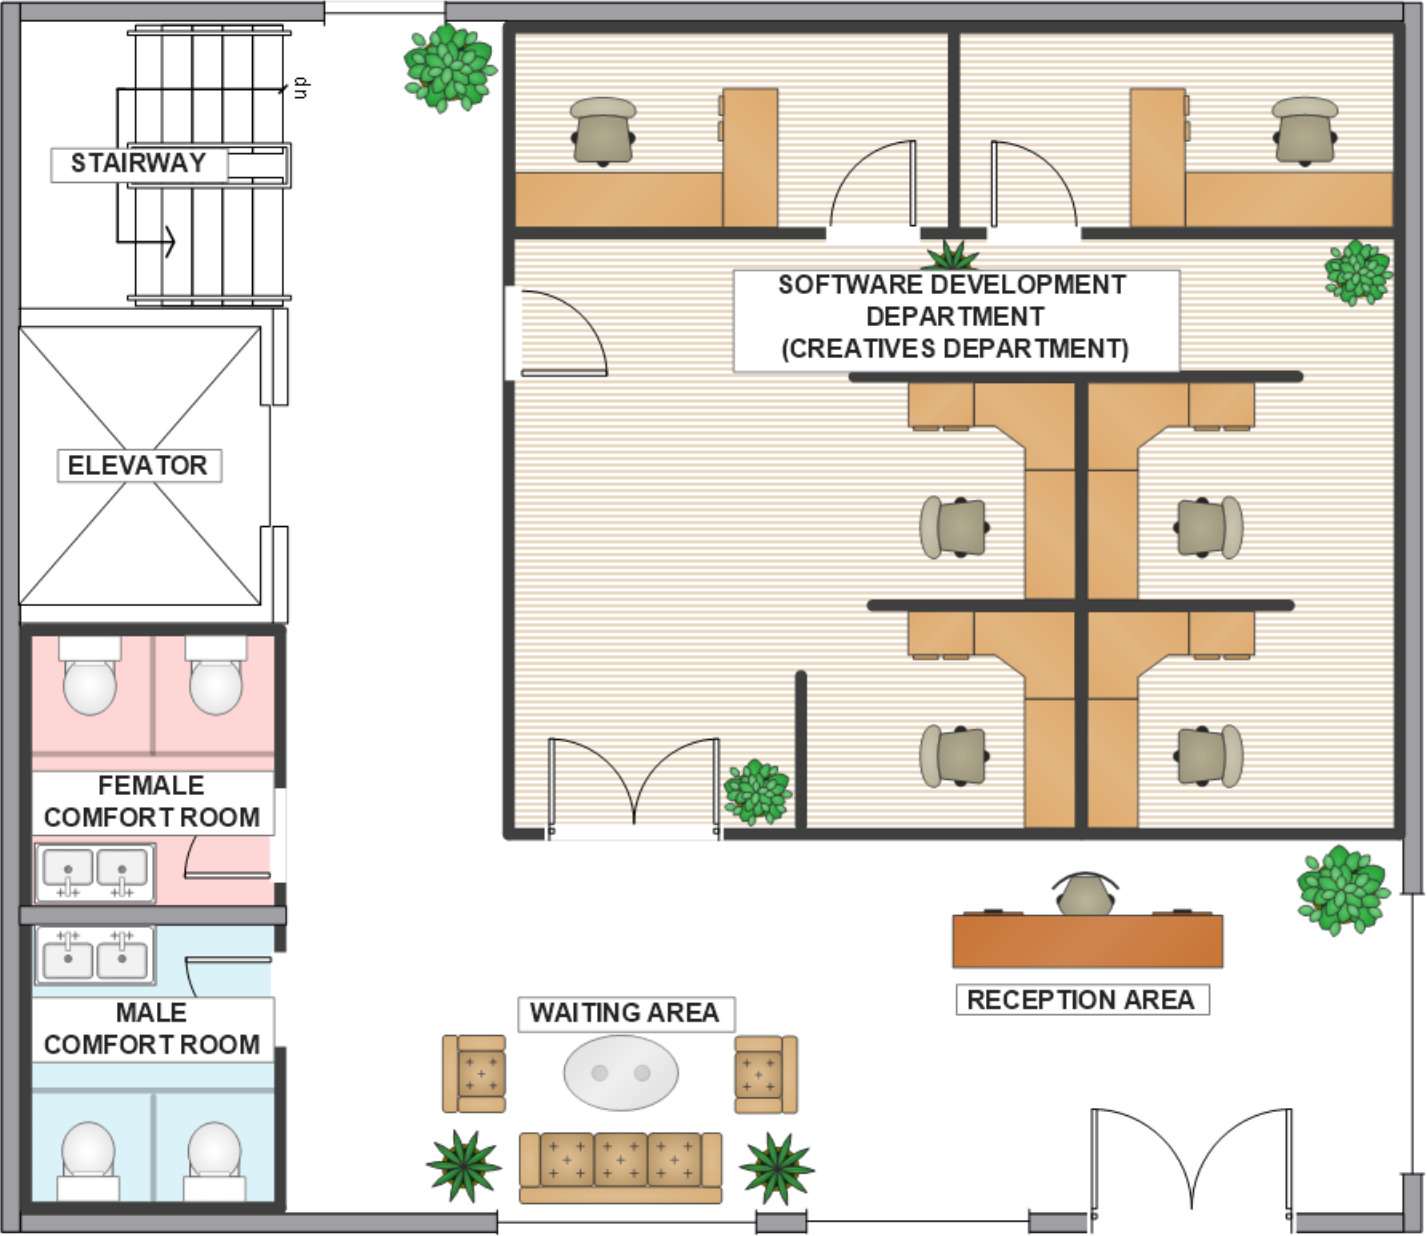

Cat6 Ethernet cable is a forward-looking option for devices with higher power demands, where thicker shielding, broader frequencies, and speed facilitate the data required for smart technologies without heating your cable and resulting in downtime. Administrators often use Cat6 cables to reduce DC resistance and the resultant power loss while maintaining performance.

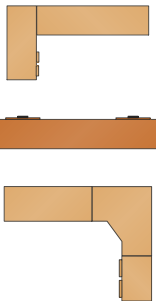

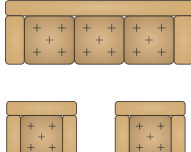

Cat6 Ethernet cable is a cost-effective option for smart home installations, enterprise networks and electronic labs. It has more stringent performance specifications to enable higher speeds and more robust data transfer yet still keep an eye on price point. Administrators often use Cat6 cables at the network's backbone in conjunction with fiber optic. With the potential for better speeds and less crosstalk.

3. A network wiring plan including:

Overall Expenses

Equipment Purchase Cost	4,680,546.17 php
Cabling and Testing Cost	303,287.86 php
Equipment Installation Cost	38,024 php
Training and Support Cost	117,891 php
Total expenses:	5,139,749.03 php

1.3 Objectives

Specific Objectives

- To design the physical and logical layouts for network infrastructure of the new Tier One Entertainment bldg.
- To construct a simulation facility to represent Tier One Entertainment.
- To deploy the proposed structured cabling design.
- To design and implement cabling facility.
- Acquisition of Devices & Applications.
- To identify and acquire the necessary Network Devices & Equipment.
 - Budget
 - Device
 - Application

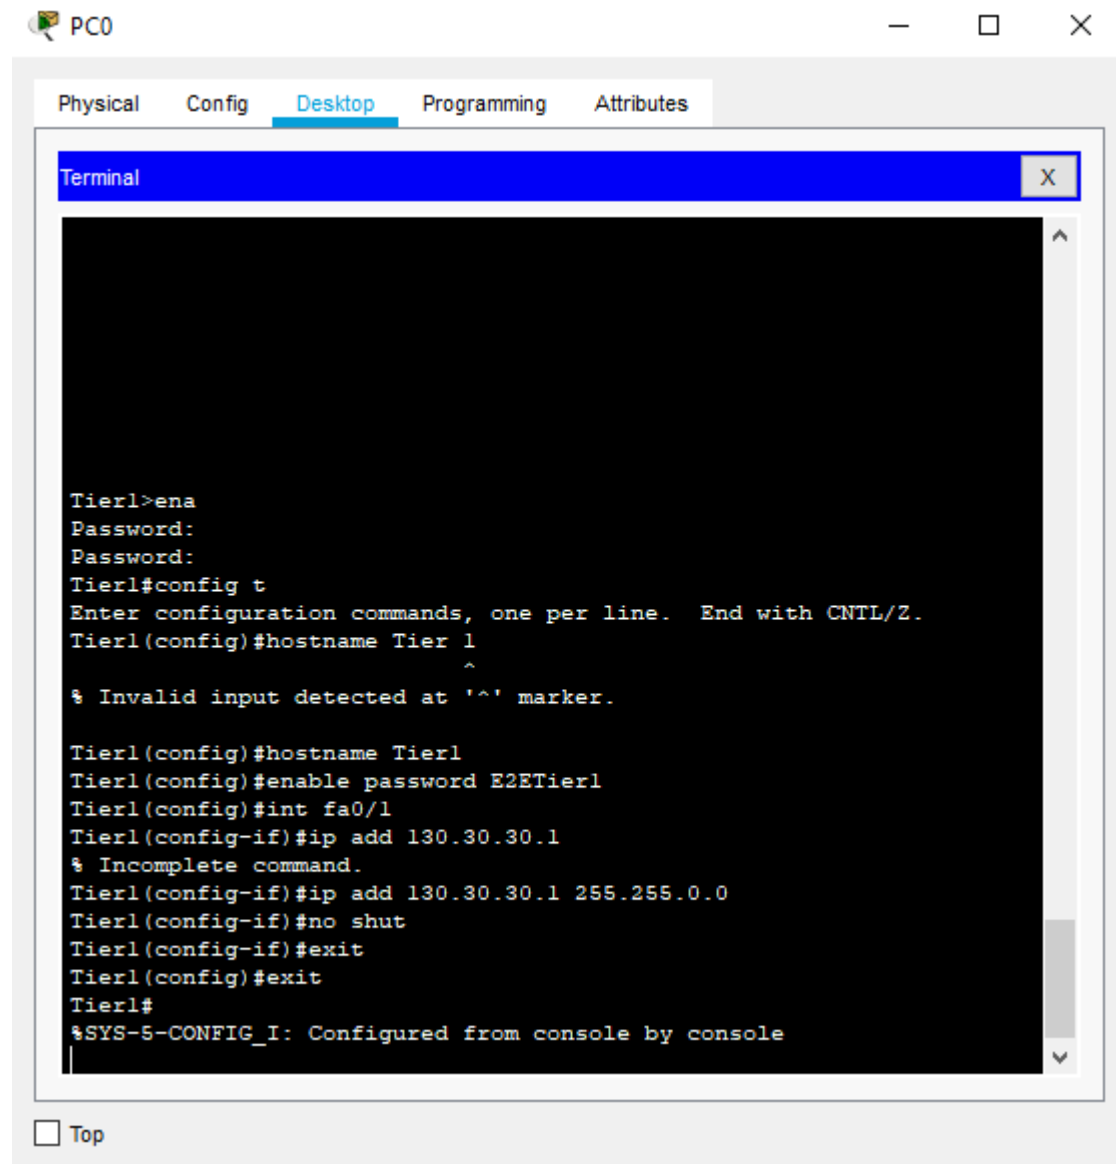

1.4 Logical Configuration of proposed network

- Codes per router

Server Router

Hostname: Tier1

Password: E2ETier1

The screenshot shows a window titled "PC0" with a tabbed interface. The "Desktop" tab is active, displaying a terminal window. The terminal shows the following commands and output:

```
Tier1>ena
Password:
Password:
Tier1#config t
Enter configuration commands, one per line.  End with CNTL/Z.
Tier1(config)#hostname Tier 1
      ^
% Invalid input detected at '^' marker.

Tier1(config)#hostname Tier1
Tier1(config)#enable password E2ETier1
Tier1(config)#int fa0/1
Tier1(config-if)#ip add 130.30.30.1
% Incomplete command.
Tier1(config-if)#ip add 130.30.30.1 255.255.0.0
Tier1(config-if)#no shut
Tier1(config-if)#exit
Tier1(config)#exit
Tier1#
%SYS-5-CONFIG_I: Configured from console by console
```

At the bottom of the window, there is a checkbox labeled "Top".

1.5 Recommendations and Summary

Summary:

The establishment is composed of three floors. A small property that holds multiple departments and utility rooms. Each of the floors contain a mid to high-end computer, with cost ranging from 50,000 Php to 200,000 Php. All of which are interconnected to devices on other floors through an organized and divided network, with the cost reaching the minimum of 200,000 Php.

Logical configuration of the network is divided by floor. Each floor has its own local area that is connected to a switch. The switch is then connected to the server room on the second floor. It is a basic design that allows data transfer on all floors.

Recommendation:

On future developments or expansions, it is advised that the network is to be divided by departments. And as for internet connection, it would be recommended to have backups, as the internet is essential to a streaming company. And lastly, future renovations should include a cafeteria and other devices such as a printer. It is essential that frequently used areas or equipment is present in the establishment to maximize efficiency.

We would like to recommend this project that has proven that a standard network system can be designed with high cost. Although we used the actual devices in designing the network, the security of this network turned out to be very strong. This is because the firewall and back up devices used in their network are of good quality.

All network needs many servers for doing their work. For this research, we did not use all servers because of cost, but we used some important server such as MDF and IDF. These servers help the network to perform their functions in smooth way.

The emergence of different platform for digital entertainment (esports and gaming) recently gave us an idea to offer a simple and cost-effective Tier One Entertainment network. We made it easy for everyone to apply/use the system.

1.6 Curriculum Vitae

SOFIA RICHE P. BARRIOS

4038 J Luna Street South Cembo

Contact No: 09511331967

CAREER OBJECTIVE:

I am seeking a role in a company where I can contribute my ideas and be mentored towards a successful career.

PERSONAL DATA:

Gender	:	Female
Date of Birth	:	March 16, 2001
Place of Birth	:	Sta. Mesa
Height	:	5'5
Weight	:	56 kgs.
Civil Status	:	Single
Citezenship	:	Filipino
Religion	:	Catholic
Father's Name	:	Rodel S. Barrios
Mother's Name	:	Rowena P. Barrios
Languages	:	Tagalog, English

EDUCATIONAL BACKGROUND:

Tertiary: STI College Global City
Bachelor of Science in Information Technology (BSIT)
Taguig City
2019 – Up to present

Secondary: Mabini College
Gas (General Academic Strand)
